

# Consent

We consider that patients attending this practice expect that information provided will be used only to assist in managing their health care. We also consider that patients would reasonably expect that selected personal health details will be disclosed to other health services directly involved in providing a health service to the individual. For example, if a blood sample is taken, we anticipate that the patient would reasonably expect that the pathology service provider will receive details clearly identifying who the sample was taken from (patient name, contact details, date of birth) and what tests the doctor is requesting be conducted on the sample. If you are concerned about any related secondary use or disclosure of your personal health information you should speak to your doctor (or practice staff, if appropriate) about your concerns.

## Should I sign a consent form?

By signing consent to the use and disclosure of your personal health information you can assist the practice to ensure that necessary information is available to those involved in your health
